

ITEM: 18

SUBJECT: J.F. Shea Construction, Inc., dba Fawndale Rock and Asphalt
Shasta County

BOARD ACTION: *Consideration of NPDES Permit Renewal*

BACKGROUND: J.F. Shea Construction, Inc., dba Fawndale Rock and Asphalt (Discharger) owns and operates a rock quarry and asphalt plant facility and discharges industrial storm water to the West Fork of Stillwater Creek, in Shasta County. Settled industrial stormwater from several mining, processing, and production areas of the facility is discharged during wet weather periods to the West Fork of Stillwater Creek. The proposed Order requires the Discharger to implement Best Management Practices to control pollutants in its discharge, and implements receiving water limitations to ensure the quality of the receiving water is protected.

ISSUES:

The Discharger, and another similar local regulated facility have objected to the inclusion of receiving water limitations for aluminum, iron, and manganese. Regional Water Board believe that the limitations are appropriate, and have added language to the proposed Order to clarify the compliance determination language. The new language is being reviewed by the interested parties.

RECOMMENDATION: Adopt the proposed order.
